

## PELLETIZED ACTIVATED CARBON CR2D-90

CR2D-90 is a pelletized activated carbon produced from select bamboo wood by a high temperature activation process under stringent quality control. It has a large surface area, high mechanical hardness, excellent pore volume, with unique distribution of pore sizes.

### FEATURES AND BENEFITS

- ◆ High adsorption capacity and efficiency
  - ◆ Hard and durable
  - ◆ Highly developed pore structure

---

### SPECIFICATIONS

|                                   |                      |
|-----------------------------------|----------------------|
| Particle shape                    | 2-mm diameter pellet |
| Iodine Number (mg/g)              | 1300 minimum         |
| Carbon Tetrachloride Number       | 90% minimum          |
| Methylene Blue (mg/g)             | 250 minimum          |
| Hardness Number                   | 90 minimum           |
| Moisture (as packed)              | 5% maximum           |
| Ash Content                       | 6%                   |
| Ph                                | 9                    |
| Bulk Density (cm <sup>3</sup> /g) | 0.40 typical         |

---

Packaged in 44-lb. bags or 850-lb. super sacks.  
All of the above test methods are performed using AWWA and ASTM protocol for activated carbon.
